Subject: Parcel 14 - Response to Final Offer and Access/Parking Concerns
Matter: City of Lone Star - East Loop Road Expansion Project - Parcel 14

Mark,

Ramirez Family Holdings, LLC does not accept the City of Lone Star's February 20, 2026 final offer for Parcel 14. We understand that the final written offer is **\$435,000**, but that figure does not address several practical impacts to the remainder property at **18420 East Loop Road, Austin, Travis County, Texas 78725**.

The offer appears to rely on the February 5, 2026 appraisal summary prepared by Lone Star Valuation Group. That appraisal treats the remaining property as though it will continue to function substantially the same after the acquisition. Based on our review of the right-of-way sketch and our knowledge of daily operations at the property, that assumption is not correct.

Specific access and parking concerns

- **Parking loss:** The proposed fee acquisition and construction layout appear to eliminate approximately **14 striped parking spaces** along the East Loop Road frontage. The appraisal summary states that parking remains adequate, but it does not explain how that conclusion was reached.
- **Driveway closure:** The documents we have seen indicate that the existing western driveway, referred to as **Driveway B** in the parcel materials, will be closed. That driveway is currently used by delivery trucks and service vehicles.
- **Relocated access:** The proposed replacement driveway appears to be approximately **120 feet east** of the current access point. We are concerned that this relocation will reduce visibility and create a less convenient traffic pattern for customers and tenants.
- **Truck circulation:** Delivery trucks currently use the front drive aisle to enter, turn around, and exit without backing into East Loop Road. After the taking, we do not believe delivery trucks will be able to circulate safely without using tenant parking areas.
- **Tenant impact:** Our primary tenant, Hill Country Dental Supply, has told us that the loss of parking and truck access could affect its lease renewal decision. The current lease requires at least **40 usable customer and employee spaces**.
- **Construction disruption:** The temporary construction easement is described as **0.22 acres**, but we have not received a construction phasing plan showing how long the easement area will be blocked or whether driveway access will be maintained during construction.

Documents requested

- Complete appraisal report and appraisal work file, not just the summary.
- Final construction plans or the most current plan set for the East Loop Road Expansion Project.
- Access management plan showing driveway closures, relocations, temporary access, and post-project circulation.
- Parking layout or engineering analysis supporting the conclusion that the remainder property will retain adequate parking.
- Construction phasing schedule for the temporary construction easement.
- Any drainage, utility relocation, or grading plans affecting Parcel 14 or the remainder property.

Position regarding the final offer

At this time, Ramirez Family Holdings rejects the final offer of **\$435,000**. We are not refusing to continue discussions, but the offer does not appear to account for the access, parking, truck circulation, tenant, and construction impacts described above.

We are consulting with counsel and expect to obtain an independent valuation review. Please direct further communications about settlement or condemnation deadlines to our attorney, David Chen, copied above.

Nothing in this email should be treated as a waiver of any objection, claim, defense, valuation position, or right to seek full compensation for the taking and damages to the remainder property.

Regards,

Elena Ramirez
